WORK EXPERIENCE

CUSTOR Computing Senior Full-Stack Developer/Team Lead

Ethiopia, Addis Ababa (Full time)

DEC 2023- PRESENT

IVSMS(tst) :- is a **multi-tenant** Integrated Vehicle Services Management System, automating operations for over **970,000** vehicles across the city and other regions.

- Managing an application with **10,000 - 20,000** active daily users
- Generating over **\$35 million** in annual revenue by enhancing system efficiency and ensuring seamless service delivery.
- Lead technical decision-making and evaluate new tools/technologies to improve system architecture.
- Conducting code reviews and pull request merging, offering constructive feedback to peers to ensure high code quality and adherence to standards.
- Mentored **5** junior developers, significantly improving their skills and contributing to successful project outcomes.

Tech Stacks: Asp.net core, EF, Fluent Validation, CQRS, MediatR, AutoMapper, OAuth 2.0, JWT, (Microsoft Identity, IdentityServer(Duende)), SQL server 2022, Syncfusion, DevExpress, Highchart, Angular, Rxjs, , Git, AzureDevOPs, Azure App Service, Teams, Jira, Agile methodology, xUnit, Docker, BenchmarkDotNet, Sql ServerAgent, Stored procedures, Swagger / OpenAPI.

ICSMIS(CENSUS) :- is a digital platform implemented to modernize civil service human resource management in Ethiopia. As part of this initiative, a nationwide census of government employees is

being conducted to collect and store employee data in a centralized database.

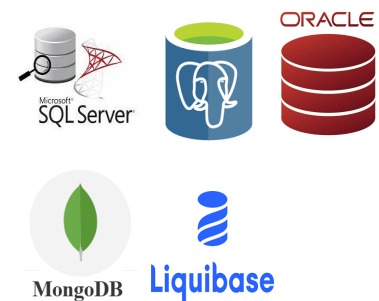

- Collaborated with product owners, QA, and designers to define requirements
- Built workflow-based system for approval processes by Elsa workflow
- Built responsive, dynamic and high-performance user interfaces
- Built RESTful APIs and integrating backend services
- Optimized application performance and ensure reliability
- Designed and implemented scalable SQL Server database schemas, including tables, relationships, indexes, and constraints aligned with application requirements.

TECHNOLOGIES

Frameworks

Databases

Cloud

Tech Stacks: Java, Spring Boot, Spring Data JPA, MongoDB, Spring Security 6, JWT, Lombok, Kafka, Maven, Docker, Git, Azure DevOps

Projet Solaire([solaire](#))

Backend Developer

[France](#) (Remote-Freelance)

Sep 2025 - Apr 2026

A platform that developed for solar energy tenders and supplier workflow

- Designed database schema and relationships
- Worked on hardware market place modules (Supplier, Installer and House holder portals).
- Built and optimized RESTFUL APIs to support frontend applications and third-party integrations.
- Participated in code reviews and technical discussions to improve code quality and system design.

Tech Stacks: Java, Spring Boot, Spring Data JPA, MongoDB, Spring Security 6, JWT, Lombok, Kafka, Maven, Docker, Git, Azure DevOps

Others

AWARDS

Received appreciation certificate for successfully developing and deploying a web application for the **NGO** organization called BezaComda (April-5-2022).

Certificate, of course, completion for **ORACLE 12c** Database Administration (May-30-2020).

Certificate, of course completion for CCNA1, CCNA2, CCNA3, CCNA4 (June-2017).

EDUCATION

Haramaya University, BA Degree (Software Engineering) (2015-2018)

LANGUAGES

English **Fluent**
Amharic **Native**
Germany **A1**

Eptisa Servicios de Ingeniería, S.L Madrid Senior Software Engineer

[Spain, Madrid](#) (Hybrid-Contract)

FEB 2023 - AUG 2023

- Worked on the project called Road Accident Data Management System, which recorded vehicle accidents across the country.
- Migrated over **90,000** records into the system, ensuring data integrity and accessibility.
- Designed, developed, and maintained RESTful APIs, delivering a robust and reliable solution.

Tech Stacks: Angular, state management library NgRx, Asp.net core, Entity Framework, Microsoft SQL, Git, Azure DevOps, Git, Teams, Slack, Jira, Agile.

Excellerentsolutions US Pittsburgh,

Software Engineer

[US, Pennsylvania](#) (Remote-Full time) [Excellerentsolution](#)

AUG 2021 - JAN 2024

Worked on multiple projects as a remote full-stack developer for **US** and **Europe-based** clients. Some of the projects are listed below

Venderful([vender](#)) - which is a web-based event management platform that enables users to host, plan, and collaborate on events with secure login and workflow features.

- Designed and implemented user-friendly interfaces for the frontend, ensuring a smooth shopping experience.
- Built and maintained server-side logic, APIs, and databases to support the platform.
- Troubleshoot and debug issues across the full stack, from front-end interfaces to back-end systems, to ensure high performance and reliability.

Tech Stacks: React, Redux Toolkit, Asp.net core, Entity Framework, PostgreSQL, Azure DevOps, Git, Teams, Jira, Agile methodology.

Enterprise Project Portfolio - is an ERP system designed to automate daily

tasks across the organization, featuring **6 key** modules: Timesheet, Project Management, Employee Registration, Applicant Tracking, Client Management, and Performance Management.

- Collaborated with cross-functional teams to define project scope, set timelines, and ensure on-time delivery of features.
- Tracked billing for completed projects, managed client information, generated invoices, and delivered detailed project reports.
- Logged work hours, tracked project time allocation, generated timesheet reports, and issued reminder emails to employees.
- Captured information for over **300** employees.
- Registered more than **35** clients and **50+** projects.

Tech Stacks: Angular, state management library NgRx, Microfrontend, Asp.net core, xUnitTesting, Entity Framework, Microsoft SQL, Git, Bitbucket, Teams, Docker, Agile development methodology.

Engage2excel US Pittsburgh,

Full-Stack Developer

US, Mooresville, North Carolina (Remote) [E2E](#)

AUG 2022 - JUN 2023

Web Report ([cxsplatform](#)) - developed web-based reports for high level managers for different companies, based on their subscription to the system.

- Designed and implemented backend services to efficiently manage over **4,000,000** records.
- Developed robust APIs to enable seamless data integration and accurate reporting.
- Achieved a cost reduction of **\$40,000-60,000** annually by eliminating the need for Tableau software.

Tech Stacks: React.js state management library Zustand, Asp.net core, xUnitTesting, Entity Framework, Microsoft SQL, Git, AzureDevOps, Azure Functions, Azure Service Bus, Docker, RabbitMQ, Microservices, Agile development methodology.

MMCYTECH

Web Developer

New York, Dubai, Addis Ababa (Hybrid-Full time) [Mmcymtech](#)

Aug 2019 - Aug 2021

- Developed an event-based web application event management application.
- Delivered **100+** projects successfully for US and Europe clients.
- Able to register **thousands** attendees with their hotel and flight booking.
- Worked closely with cross-functional teams

Tech Stacks: Java, Javascript, HTML5, Css3, AWS, Slack, Cvent, Aventri.
